1 Getting Started

Create your account and access your screenwriting studio

Welcome to ScriptLab

ScriptLab is a professional cloud-based screenwriting platform that combines industry-standard formatting with powerful AI tools. Whether you are writing a feature film, a TV pilot, or a documentary, ScriptLab gives you everything you need to take your story from concept to production-ready screenplay.

Professional Formatting

Industry-standard screenplay formatting for all genres and industries.

AI Power Tools

Generate plots, modify scenes, and create treatments with AI assistance.

Real-Time Collaboration

Write together with your co-writers with live cursor tracking.

Version Control

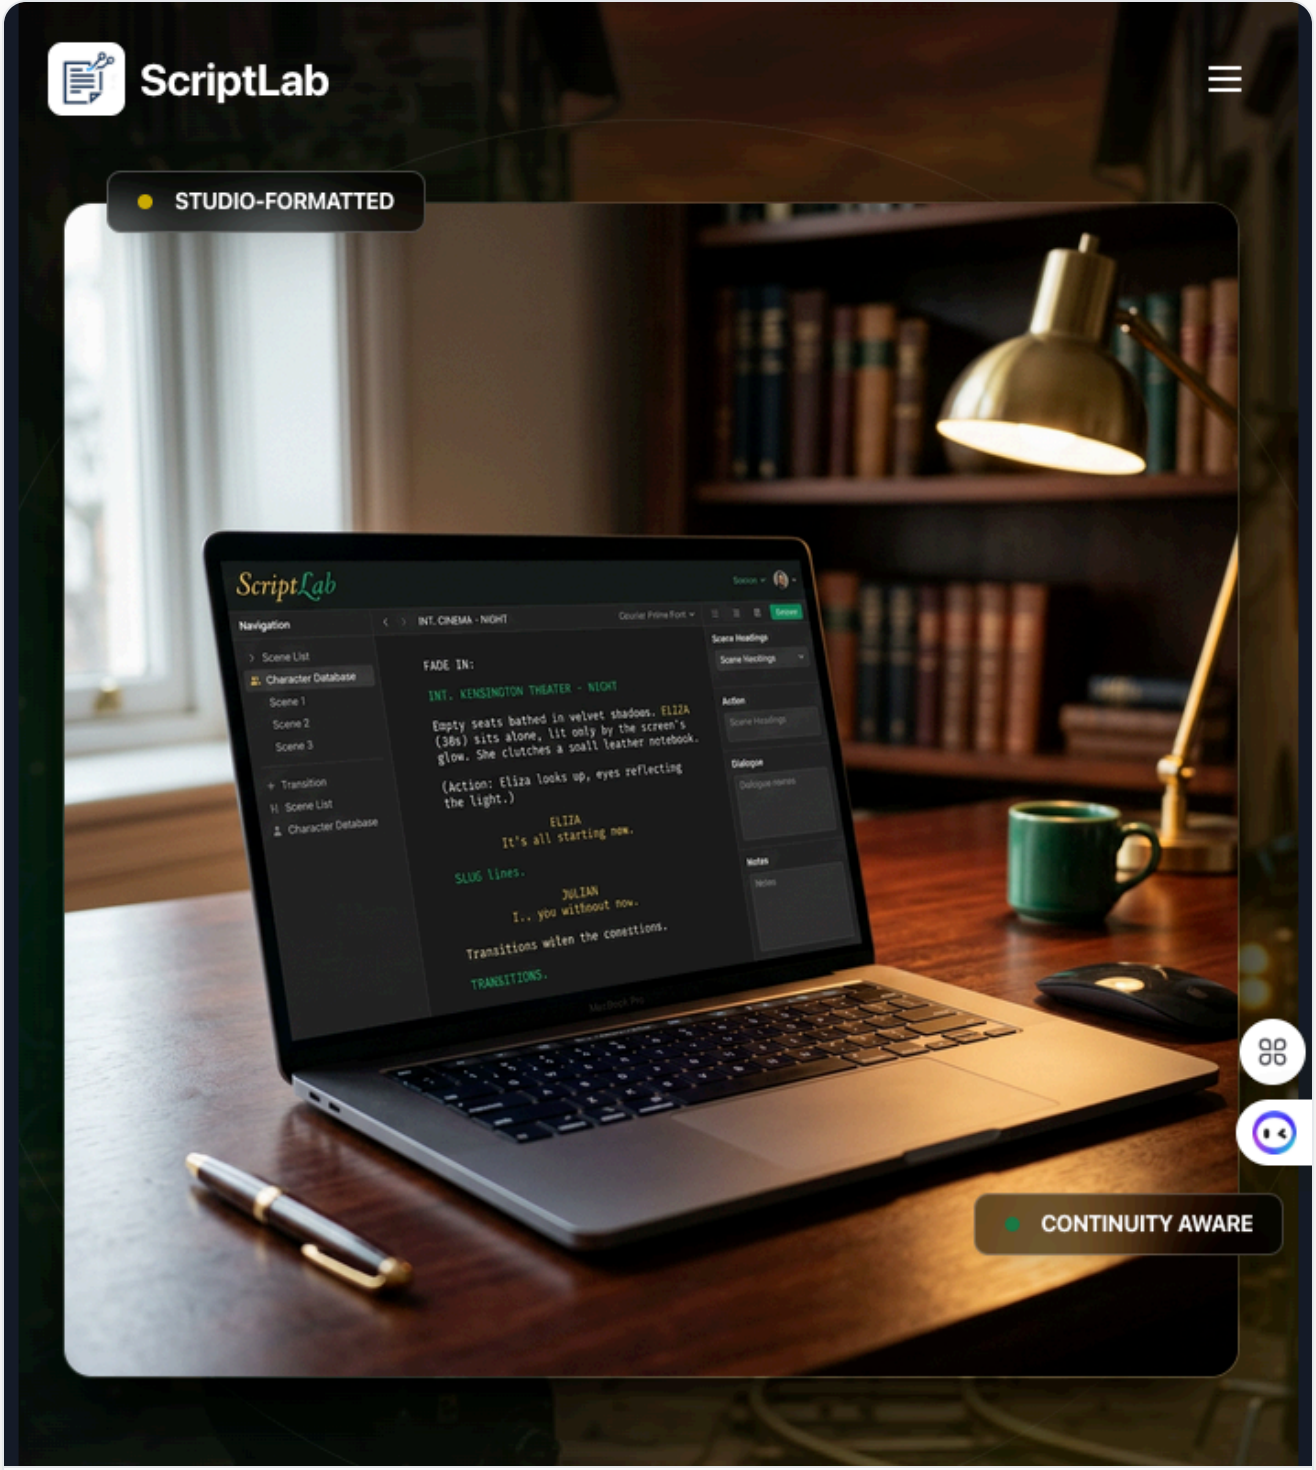
Save named snapshots and restore any previous version.

Export Ready

Export your scripts in professional PDF format.

Global Industry

Supports Nollywood, Hollywood, Bollywood and more.



The ScriptLab home page — "The AI Screenwriting Studio for the Global Film Industry"

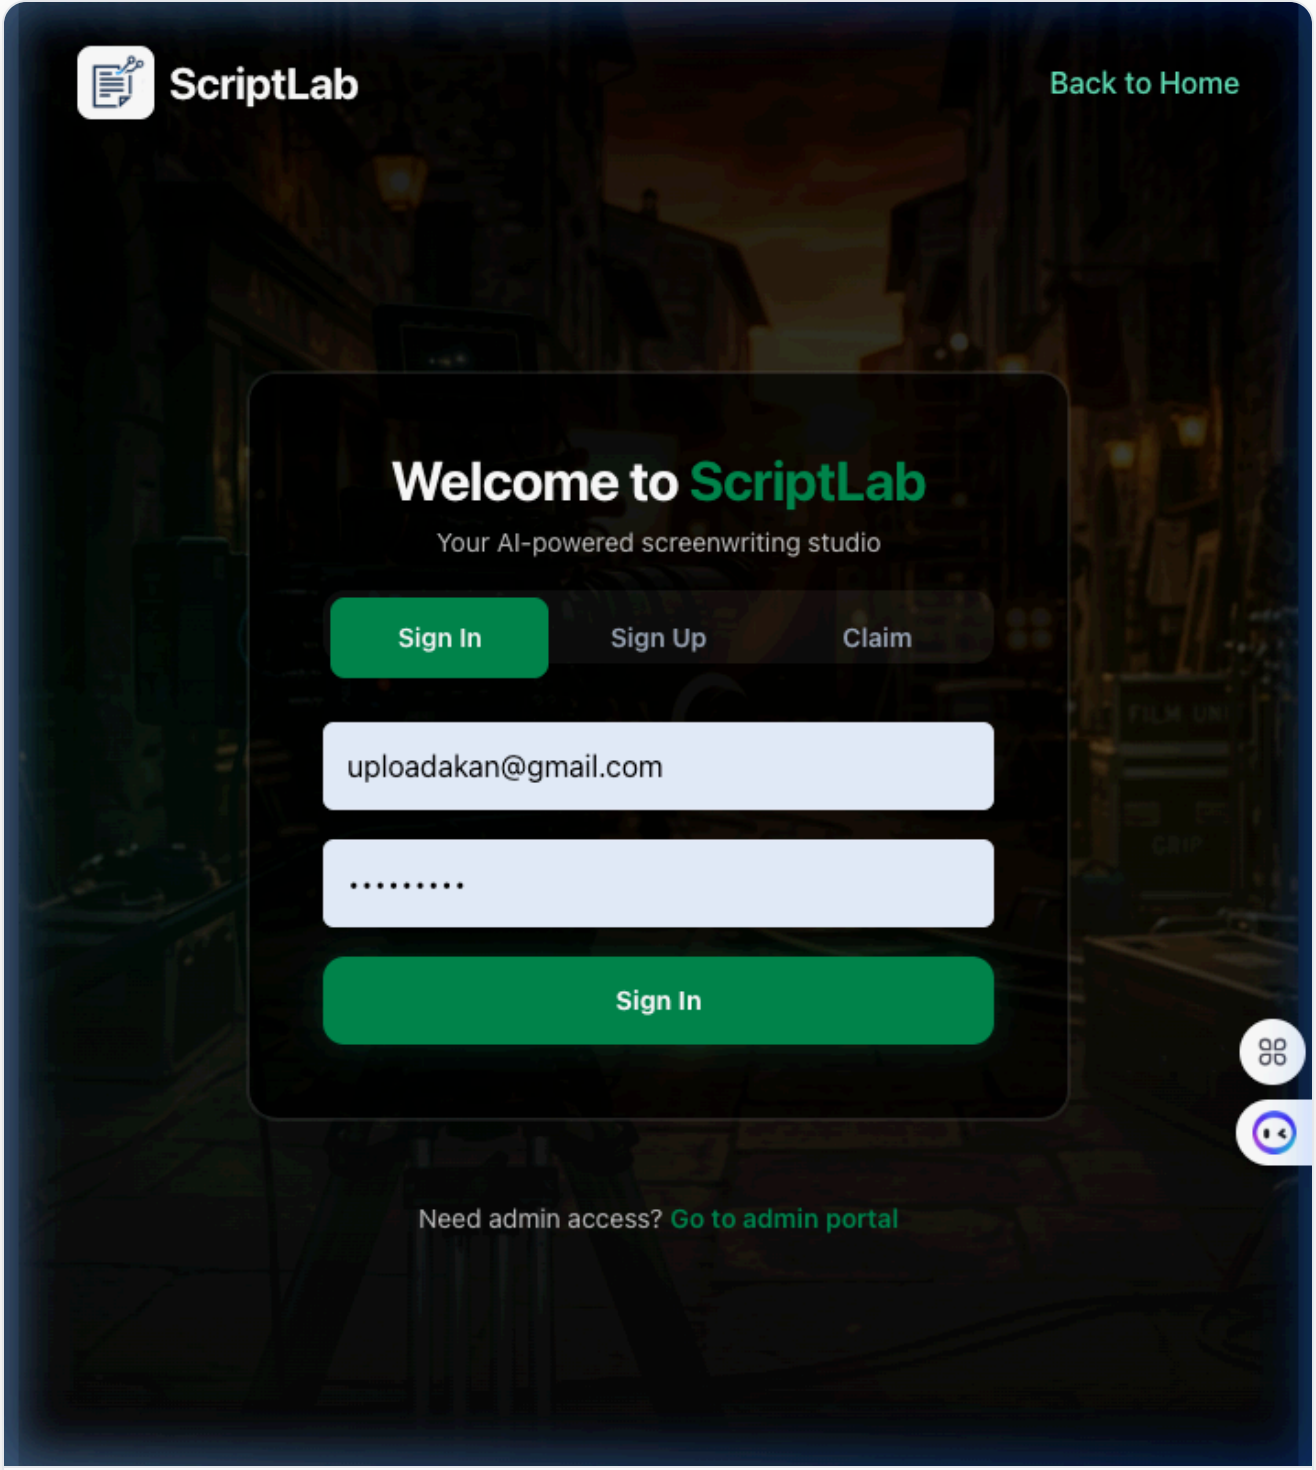
Advanced Analysis Features

ScriptLab doesn't just help you write; it helps you analyze and evolve your stories. Right from the start, you have access to two powerful analysis tools:

- **Script Analysis**: Professional-grade evaluation of your dialogue, pacing, and structure.
- **Video Analysis**: Extract story seeds, themes, and structures from any external video link (YouTube, Vimeo) to help model your next masterpiece.

Creating Your Account

1. Visit **www.scriptlap.net** in your browser (Chrome, Firefox, or Safari recommended).
2. Click the green **"Start Writing Free"** button on the landing page.
3. On the Auth page, select the **"Sign Up"** tab.
4. Enter your **email address** and create a **secure password**.
5. Click **"Create Account"**.
6. Check your email for a **confirmation link** from ScriptLab and click it.
7. You will be automatically redirected to your **Dashboard**.



The Sign In / Sign Up page — Enter your email and password to access your account

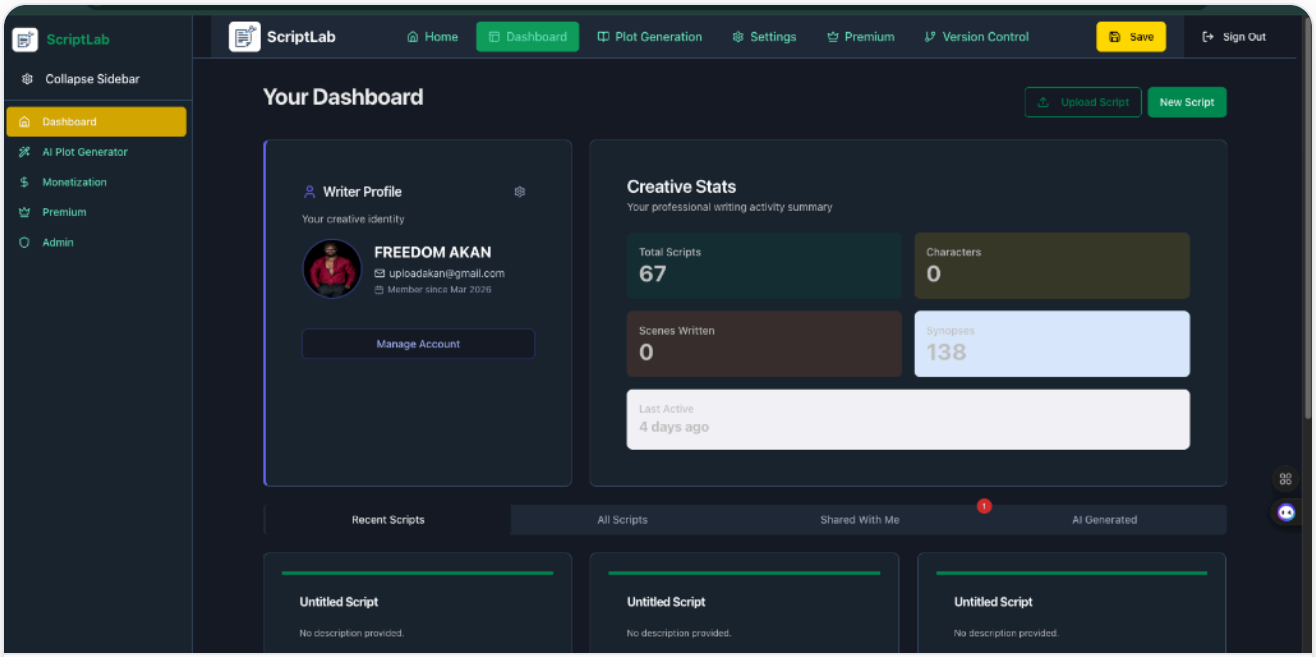
💡 **Tip**

If you didn't receive a confirmation email, check your spam or junk folder. The email is sent from **noreply@scriptlap.net**.

2 The Dashboard

Your central hub for managing all your scripts

The Dashboard is the first screen you see after logging in. It shows your Writer Profile, Creative Stats, and all your scripts organized into tabs.



The Dashboard — showing your Writer Profile, Creative Stats, and your recent scripts

Dashboard Overview

Section	What It Shows
Writer Profile	Your display name, email, avatar, and membership date
Creative Stats	Total Scripts, Characters, Scenes Written, Synopses, Last Active
Recent Scripts	Your 3 most recently edited scripts
All Scripts	Complete library of your scripts
Shared With Me	Scripts you have been invited to collaborate on

Section	What It Shows
AI Generated	Scripts generated using the AI Plot Generator

Managing Scripts

Each script appears as a card. You can:

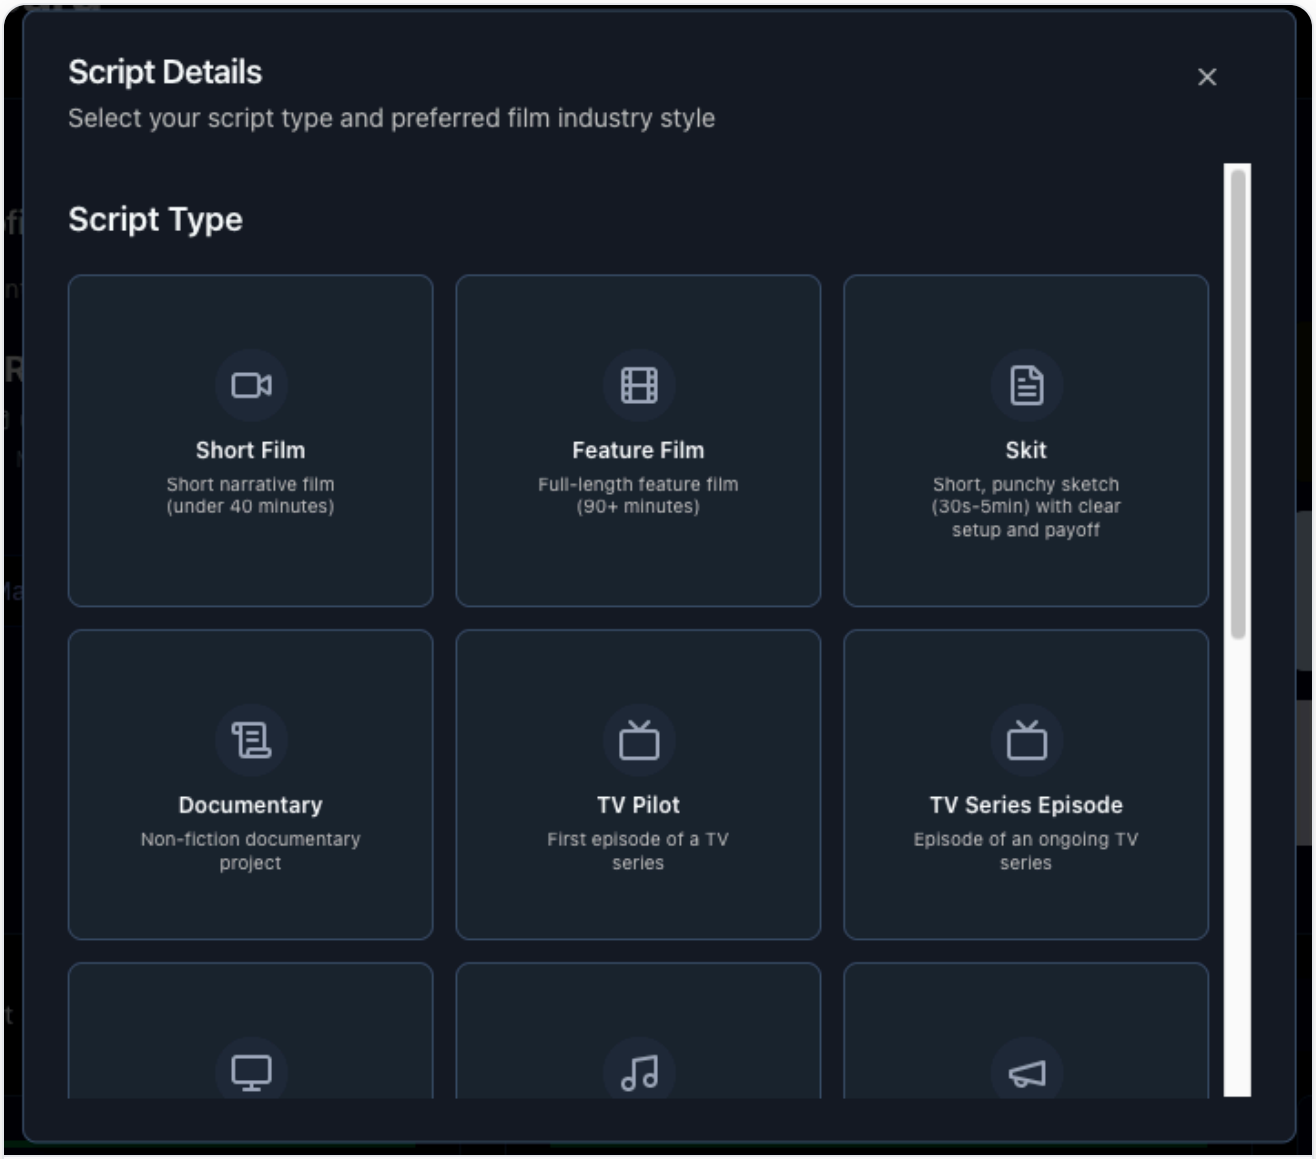
- **Open** — Click on the card to open it in the editor.
- **Options** — Use the 3-dot menu on a card to Rename, Duplicate, or Delete.
- **Upload** — Use the **"Upload Script"** button to import a PDF or DOCX file.

> ⚠️ **Caution**
> Deleting a script is **permanent**. There is no recycle bin. Make sure you have exported or saved a copy before deleting.

3 Creating a New Script

Configure your script for the right industry and format

To start a new project, click the **"+ New Script"** button on your dashboard. This opens the configuration dialog where you define the DNA of your project.



The New Script dialog — Define your title, industry, type, genre, and language

Configuration Options

Option	Description
Title	The name of your project (can be changed later)
Industry	Select Nollywood, Hollywood, Bollywood, or others for specialized formatting
Type	Feature Film, TV Series, Stage Play, or Short Script
Genre	Action, Drama, Comedy, Thriller, Documentary, etc.
Language	English, Yoruba, Igbo, Hausa, Pidgin, and more

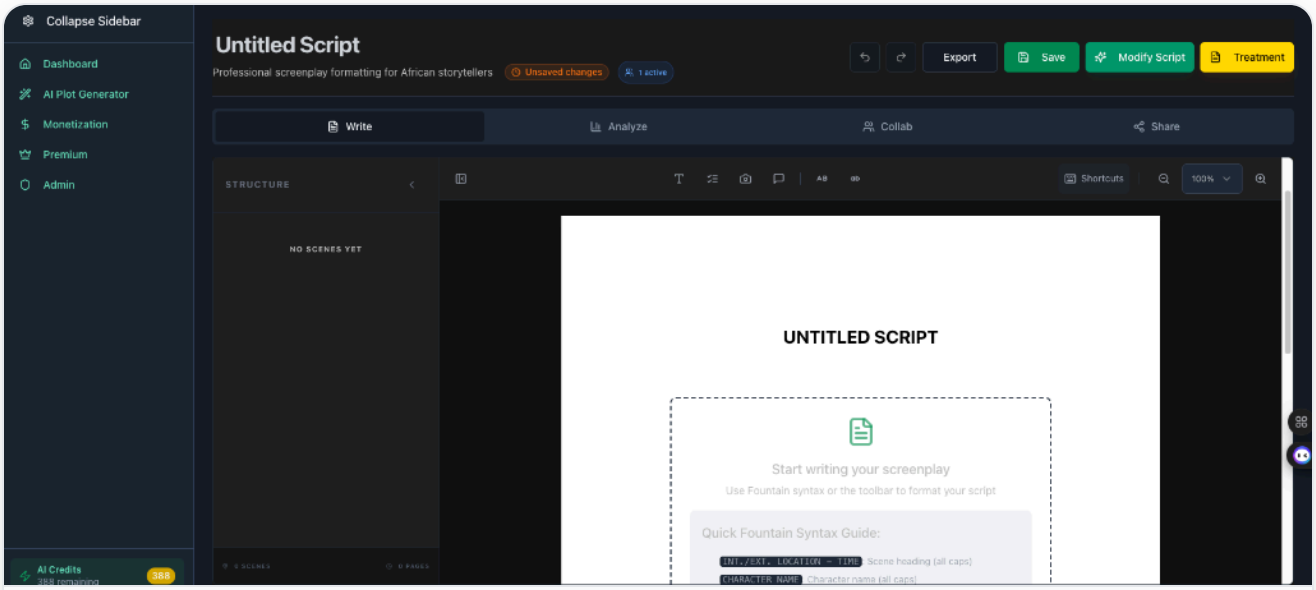
💡 **Tip**

Changing the **Industry** will automatically update the formatting templates and standard practices applied to your script elements.

4 The Script Editor

Your creative workspace with real-time formatting

The Script Editor is a focus-oriented environment designed for high-speed writing. It automatically formats your text into industry-standard screenplay elements as you type.



The Script Editor — featuring the Structure sidebar, Writing Canvas, and Format Bar

Editor Components

Structure Sidebar (Left) — Navigate through your scenes and acts instantly. Click any scene to jump to it.

Writing Canvas (Center) — The main area where your script appears. All formatting happens here in real-time.

Toolbar (Top) — Access Writer AI, Collaboration, Version Control, and Export options.

Format Bar (Bottom) — Quickly switch between element types (Scene Heading, Action, Character, etc.).

5 Script Formatting Guide

Master the elements of professional screenwriting

ScriptLab uses a "Format-as-you-type" system. You can switch element types using keyboard shortcuts or the toolbar at the bottom.

Element	Shortcut	Standard Appearance
Scene Heading	`Ctrl` + `1`	ALL CAPS, starts with INT. or EXT.
Action	`Ctrl` + `2`	Normal paragraph text, describes what we see/hear
Character	`Ctrl` + `3`	ALL CAPS, centered above dialogue
Dialogue	`Ctrl` + `4`	Centered block of text under character name
Parenthetical	`Ctrl` + `5`	(In parentheses) under character, describes HOW they speak
Transition	`Ctrl` + `6`	ALL CAPS, right-aligned (e.g. CUT TO:)

💡 **Smart Tab/Enter**

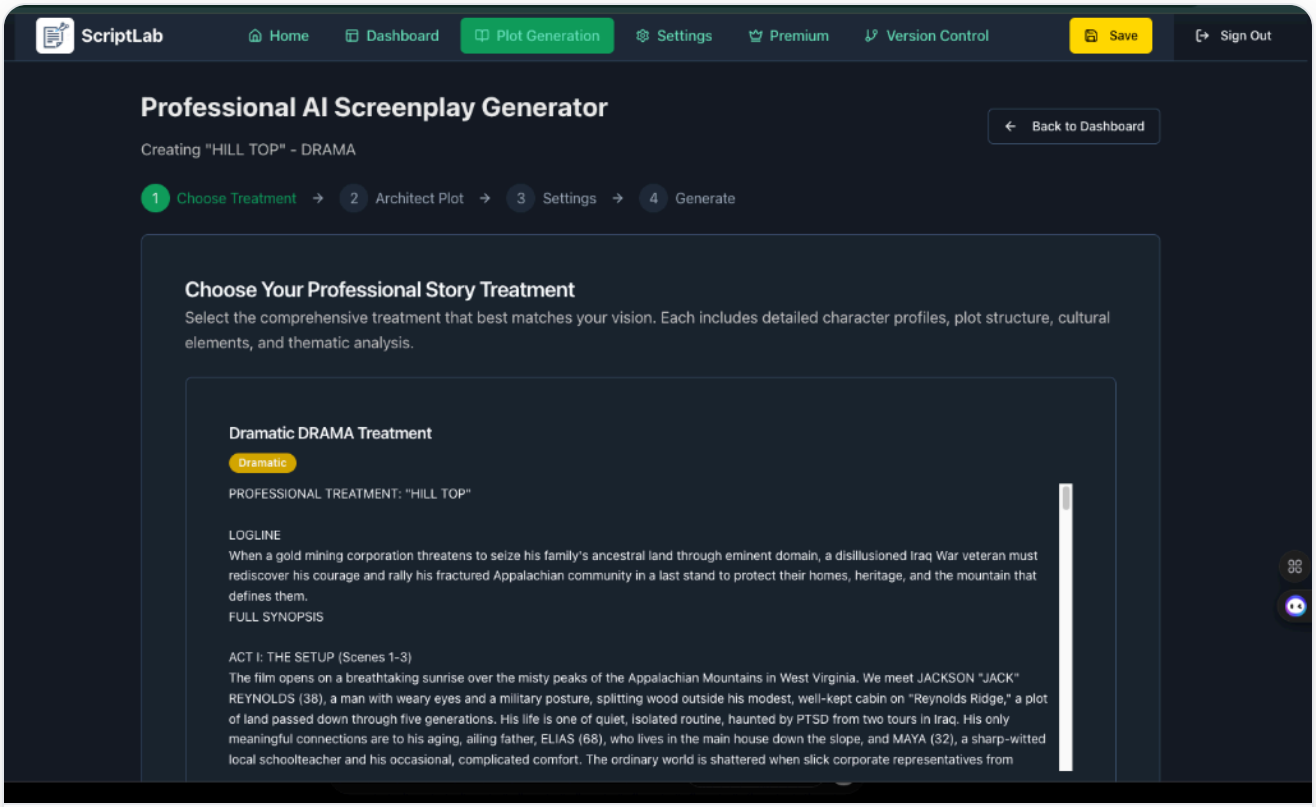
The editor predicts your next element!

- Press **Enter** after Character → Dialogue
- Press **Tab** at the start of Action → Character
- Press **Enter** twice → Scene Heading

6 AI Plot Generator

Go from a single idea to a full treatment in minutes

The AI Plot Generator helps you overcome writer's block by generating high-quality story treatments and even full scripts based on your prompts.



The AI Plot Generator — "Your Story, Power by AI"

How to Use

1. Click **"Plot Generator"** from the sidebar or dashboard.
2. Enter your **Story Seed** (a one-sentence summary of your idea).
3. Select **Target Industry** and **Format**.

4. Click **"Generate Treatment"** to get a multi-beat summary.

5. Refine the treatment and click **"Create Full Script"** to generate the initial draft.

7 AI Script Modification

Iterate and improve your scenes with AI-assisted editing

Inside the editor, the **"Writer AI"** button (Magic Wand icon) allows you to modify existing content using natural language instructions.

Core AI Commands

Goal	Example Prompt
Enhance Scene	"Make this action sequence more intense and cinematic"
Rewrite Dialogue	"Make this character sound more sarcastic and witty"
Split Scene	"Split this into two separate scenes with a location change"
Cultural Flavor	"Rewrite this market scene with authentic Lagos Pidgin"

🪄 **Apply to Script**

When the AI generates a change, you can click **"Apply to Script"** to instantly replace the selected text with the new version.

8 Collaboration

Write together in real-time from anywhere in the world

ScriptLab is built for teams. You can invite co-writers, producers, or editors to work on your script simultaneously.

Inviting Collaborators

1. Click the **"Collab"** button in the Editor Toolbar.
2. Enter the **email address** of your collaborator.
3. Choose their **Role**:
   - **Writer**: Can edit content
   - **Editor**: Can edit and manage versions
   - **Viewer**: Read-only access
4. Click **"Send Invite"**.

👥 **Live Cursors**

You will see colored cursors with the names of your collaborators as they type. Their changes are synced instantly to your screen.

9 Version Control

Never lose a previous draft again

Version control allows you to save snapshots of your script at key milestones and restore them if you change your mind about a rewrite.

Managing Versions

💾 **Save Version** — Click the **"Versions"** button and select "Save New Version". Give it a name like "Draft 1 Final".

🕒 **History List** — View a list of all saved versions with timestamps and author names.

🔄 **Restore** — Click "Restore" on any previous version to revert the script to that state.

ℹ️ **Auto-Save**

ScriptLab auto-saves your work every few seconds. Named versions are extra backups for your major milestones.

10 Subscriptions & Credits

Unlock premium AI features and unlimited projects

ScriptLab offers tiered plans to suit everyone from students to professional production companies.

Plan	Features
Free	3 Scripts, Basic Formatting, Limited AI Credits
Pro	Unlimited Scripts, Advanced AI, Priority Support, 50 Credits/mo
Studio	Team Sharing, Custom Branding, 200 Credits/mo, Collab Tools

AI Credits

AI credits power the Generator and Modifier tools. You can track your balance in your Profile. Credits can be topped up at any time via Paystack.

11 Script & Video Analysis

AI-powered quality scoring and structural video extraction

Analysis is a core pillar of ScriptLab. You can evaluate your own written screenplays or analyze external video content to understand successful story structures.

1. Script Analysis

Script Analysis evaluates your screenplay across six professional dimensions and returns a quality score, detailed suggestions, character breakdowns, pacing data, and identified strengths.

How to Run a Script Analysis

1. Open any script in the editor.
2. Click the **"Analyze"** tab in the editor toolbar.
3. The AI automatically begins analyzing your script. Wait for the loading indicator to complete.
4. Your results will appear in four tabs: **Suggestions**, **Characters**, **Pacing**, and **Strengths**.

> ⚡ **AI Credits Required**
>
> Running a script analysis consumes **3 AI credits**. Video analysis costs **5 credits**.

Quality Score Metrics

The analysis produces an **Overall Score out of 100**, broken down across Plot Structure, Character Development, Dialogue Quality, Pacing, Cultural Authenticity, and Technical Formatting.

2. Video Analysis

Video Analysis allows you to provide a URL to any film, trailer, or scene (YouTube, Vimeo, etc.) and have ScriptLab's AI extract its underlying style, structure, and themes. You can then use this analysis to "Generate a Similar Script" or study the successful elements of existing work.

Analyze Video Dialog

The Video Analysis Input — Paste your YouTube or Vimeo URL to begin

How to Analyze a Video

1. From the Dashboard or Sidebar, click **"Video Analysis"**.
2. Paste the **URL** of the video you wish to study.
3. The AI will begin "Extracting story elements, themes, and style" from the video metadata and content.

Analyzing Video State

Processing State — ScriptLab AI is identifying the narrative DNA of the video

Reviewing the Results

Once complete, you will receive a comprehensive breakdown of the video's **Story Overview**, including a professional **Logline** and **Synopsis**.

Video Analysis Complete

Analysis Results — View the identified title, verified metadata, and initial story overview

Story Overview Detail

Story Breakdown — Review the AI-generated Logline and Synopsis extracted from the video structure

Generate Similar Script

✨ Click the green **"Generate Similar Script"** button to use the analysis data as a foundation for a new script in your studio.

12 FAQ & Troubleshooting

Common questions and technical solutions

Frequently Asked Questions

Q **Can I export to Final Draft?**

We currently support high-quality PDF export and are working on .fdx support for later this year.

Q **Does ScriptLab work offline?**

ScriptLab is a cloud-based tool requiring an internet connection to sync changes and access AI features.

Q **Who owns the copyright to my AI-generated content?**

You own 100% of the intellectual property you create in ScriptLab, including content generated or modified by our AI tools.

Still need help?

Contact our support team at **support@scriptlap.net**. We typically respond within 24 hours.
